WHY SIGNAGE?

Imagine a world without signage. Where would you go and how would you get there?

Your signage is often the public's first impression of you. This is your opportunity to make a positive impact while delivering all the safety messages needed to protect customers as they enter your premises.

Clear durable signage ensures your safety message is consistently displayed even when you're not there in person. Customers quickly pick up on visual cues and will appreciate your attention to safety details.

As well as being Safety Signage Experts, we also print a wide range of custom signage for just about any situation that you can think of. This is your marketing, your brand, and your identity on display for all to see!

Whether it is promoting your business, creating awareness, or providing instruction, the team at Safety Genius have 60+ years' combined experience to provide you with the right solution for your specific needs.

“ I use **Safety Genius** on a regular basis for all my client signage. They provide me with great advice to be able to deliver a quality product. ”

PLEXUS CONSULTING

safetygenius.co.nz

WHY ARE SAFETY SIGNS IMPORTANT?

Safety signs and labels are one of the main means of communicating health and safety information. All workplaces are required under the Health and Safety at Work Act 2015 and subsequent amendments, codes of practice and regulations, to provide a safe workplace.

Having a robust and effective health and safety system requires all hazards to be identified, then either eliminated, isolated or minimised. Compliant signage helps meet these requirements.

Most signs contain a symbol or pictogram and must be of a specific colour which clearly defines its meaning. Supplementary text may also be used to help understanding.

I love dealing with **Safety Genius**. They are super friendly and helpful. They have a great range and if they don't have it, they will make it! Orders are always delivered on time and nothing is ever a problem.

Amelia Rieseberg | SAFETY1ST NZ

SAFETY SIGNS CAN BE SUMMARISED BY THE FOLLOWING:

Fire safety signs show the location of fire fighting equipment and alarms and give instruction (white symbol / text, red background)

Warning signs indicate immediate hazards exist/ are present and instruct that immediate care must be exercised. A symbol and text can describe the hazard (black text / symbol, yellow background)

Mandatory signs indicate an action that needs to be applied to the area to ensure work is carried out safely (white on blue / black text)

Emergency information signs are to indicate the location of related facilities such as exits, safety gear, etc (white symbol / text, green background)

SAFETY, SUSTAINABILITY AND INNOVATION

Clear, effective and long-lasting safety signage requires an understanding of design, materials and manufacturing.

As a New Zealand-based manufacturer of safety signage and safety solutions, we estimate about 95% of the products we sell are made in our factory in the Waikato. Our extensive range of print technology has extended our capabilities to print solvent-free and environmentally friendly jobs, whatever your printing and signage requirements may be.

VIEWING SIZES

What size do I need?

“ Darwin and his team are our preferred supplier for signage and associated products they supply. We have always had great service and competitive pricing but more importantly we have developed a long term relationship that is based on **Safety Genius** going the extra mile. ”

Ross McGlone | WORKWEAR & SAFETY 2000 LTD

ORDERING INFORMATION

Our safety signs and labels are made to suit New Zealand and Australian standards NZ/AS 1319-1994.

Our signs can be manufactured using varying types of material, giving you the option to find the best product for your environment.

Some of our core range of materials on hand are listed, but we are not limited to what is displayed here. We will manufacture or source supplies to meet our customer demand.

SELF-ADHESIVE	SA	Applied directly to substrate, suitable for exterior use to clean, flat surfaces
CORFLUTE	CF	Lightweight corrugated plastic board
ACM PANEL	ACM	Aluminium composite material, exterior use, UV stabilised – not magnetic
LUMINOUS	LUM	Glow in the dark
MAGNETIC	MAG	Flexible magnetic sheeting

ABOUT US

It all started in a garage – Dad as the screen printer, the Sister as the sign maker and the Brother the accountant.

We focused on a specialty product – Safety Signage.

Staff were added, and we grew until the garage couldn't hold us any more.

A few years back, we changed our name, as we wanted a brand that would be easily recognised as an expert in Safety Signage.

Fast forward 10 years and the Safety Genius brand of products can be found all the way from Kerikeri to Invercargill, and plenty of places in between.

CUSTOMISED SIGNS

Our company can produce signage to your exact requirements without lengthy turnaround times. By keeping well-informed and up-to-date with new and forthcoming regulations, we ensure you are getting the right product for your environment.

STOCK SIGNS

Customise these stock signs with your own message or add your company logo!

Please Note: Our signs are robust and made to last when well maintained. Should general wear and tear – or vandalism – make your signage difficult to read, that's the time for replacment.

ADD LAMINATE TO ANY SIGN

Clear protective laminate provides an extra layer of durable protection that will keep your signage looking new and fresh for much longer. Laminate your signs for:

Durability & Longevity: The protective laminate adds durability and prolongs the life of the print, reducing scratches and wear. Your signage will be much easier to clean with a laminated surface.

UV Protection: Your signs will retain their colour and contrast longer with the UV protection provided by laminate. This added layer of defence helps reduce fading caused by the sun.

Minimising Damage: Laminate protects your signs from damage caused by environmental conditions as well. The protective laminate guards your prints against heat, moisture, dirt, and dust.

STARTER PACKS

Safety Genius Starter Packs are bundles of signs designed for cost savings for your particular business.

OFFICE SIGN PACK

OFFICE SIGN STARTER PACK

- Includes:
- 1 x Assembly Point 240 x 340mm ACM | EM806-S
 - 1 x First Aid 240 x 340mm ACM | EM805-S
 - 1 x Exit 340 x 200mm ACM | EX701
 - 1 x Male 1 x Female 1 x Disabled 200 x 200mm ACM | GS1209, GS1208, GS1210
 - 1 x Reception 400 x 100mm ACM | GS1218

FARM SIGN PACK

FARM SIGN STARTER PACK

- Includes:
- 1 x Hazchem Diesel Tank 680 x 620mm SA | HA950
 - 1 x Warning Multiple Hazard Area Hazchem 450 x 450mm ACM | WSHC
 - 3 x Fuel ID Tags – 1 x Unleaded, 1 x 2-Stroke, 1 x Diesel ACM | FTU, FT2S, FTD
 - 1 x First Aid 240 x 340mm ACM | EM805-S
 - 1 x Multiple Hazard Area Health & Safety Act 2015 240 x 340mm ACM | MS601-S

WORKSHOP SIGN PACK

WORKSHOP SIGN STARTER PACK

- 1 x Assembly Point 240 x 340mm ACM | EM806-S
 - 1 x First Aid 240 x 340mm ACM | EM805-S
 - 1 x Exit 340 x 200mm ACM | EX701
 - 1 x Male 1 x Female 1 x Disabled 200 x 200mm ACM | GS1208, GS1209, GS1210
 - 1 x Reception 400 x 100mm ACM | GS1218
 - 1 x Fire Extinguisher 240 x 340mm ACM | FS902-S
 - 1 x Multiple Hazard Area Health & Safety Act 2015 240 x 340mm ACM | MS601-S
 - 1 x No Entry Authorised Personnel Only 240 x 340mm ACM | PS302-S

FIRST AID SIGN PACK

FIRST AID SIGN STARTER PACK

- Includes:
- 1 x First Aid 240 x 340mm ACM | EM802-S
 - 1 x CPR Instructions 300 x 450mm ACM | CPR100-M
 - 1 x Emergency Eye Wash 240 x 340mm ACM | EM808-S
 - 1 x First Aid Fire Extinguisher Inside 200 x 100mm SA | FAFE-SA

CONSTRUCTION SIGN PACK

CONSTRUCTION SIGN STARTER PACK

- Includes:
- 1 x First Aid 340 x 240mm ACM | EM802-S
 - 1 x Multiple Hazard Area Health & Safety Act 2015 240 x 340mm ACM | MS601-S
 - 1 x PPE Must be worn at all times 450 x 300mm ACM | MS635-M
 - 1 x Danger Keep Out Construction Site 450 x 300mm CF | CS1303-M
 - 1 x On Site Hazard ID Board 480 x 600 ACM | HIB1001-L
 - 1 x Danger Construction Multi Hazard Sign 600 x 900 CF | DCS2001

HAZCHEM SIGNS

A substance is hazardous if it exceeds the threshold for one or more hazardous properties. Most hazardous substances will have more than one hazardous property; for example, petrol is flammable, toxic and ecotoxic.

Each of the seven listed properties below has different levels of hazard – from the least to the most hazardous. In New Zealand, the Hazardous Substances and New Organisms Act (HSNO Act) provides controls for all the hazardous properties of a substance.

Transporters, handlers, manufacturers or storers of dangerous goods

NZS 5433:1999 Transport of dangerous goods on land

THE HAZARDOUS PROPERTIES ARE:

EXPLOSIVE	FLAMMABLE			OXIDIZING	TOXIC	RADIOACTIVE	CORROSIVE	ECOTOXIC
Class 1	Class 2	Class 3	Class 4	Class 5	Class 6	Class 7	Class 8	Class 9

HAZCHEM SIGNS

Each of us has a responsibility to help safeguard people and protect the environment, particularly when hazardous substances and dangerous goods are involved. People handling hazardous substances, including chemicals in the workplace, need immediate access to critical information such as:

- What hazardous substances are present.
- The nature and extent of the hazard presented by the substance.

- Any necessary precautions to use the substances safely and avoid any adverse environmental effects, and action required in an emergency.

Simple requirements such as product labels, workplace and transport documentation and warning signage are essential aids to recognise hazards quickly and accurately manage associated risk.

TRANSPORTING DIESEL AND OTHER ENVIRONMENTALLY HAZARDOUS SUBSTANCES (UN 3077 AND UN 3082)

For containers over 5 litres up to 25 litres
TS200
50 x 50 diamonds
Overall label size 150 x 200

For containers over 25 litres
TS201
100 x 100 diamonds
Overall label size 300 x 200

TS130

TS125

TS111

For Tank Wagons, Tank Trailers and containers over 450 litres
250 x 250 diamonds
Emergency Information Panel
297 x 420 (S) or 400 x 600 (L) SA | ACM

TS107
Sizes start from 600 x 400
1-6 DG labels available on ACM | SA

TS177
Sizes start from 600 x 400
1-4 DG labels available on ACM | SA

SITE ENTRANCE HAZCHEM SIGNS

Entrance signs are required on the main entrance to the property. This may also include transition areas within the site that are not direct entrances to the storage area. An entrance Hazchem sign will include the following information:

- All Dangerous goods diamonds 100 x 100mm related to product stored on site
- Emergency contact information

TS150
Sizes start from 800 x 900
1 DG labels available on ACM | SA

BULK STORAGE AREAS

Where there is bulk storage of hazardous chemicals, a Hazchem sign is needed. The requirement for bulk storage signage is determined by the quantities outlined in the HSNO approved Code of Practice. A Bulk Storage Hazchem sign includes the following information:

- The word HAZCHEM at 100mm high on a Orange background
- The 250mm dangerous goods diamond relative to the product being stored
- Precautionary information (i.e No Smoking, No Naked Flames)
- The Hazchem Code 100mm high
- The UN No. and the name of the product
- On site emergency contact information

TS151
Sizes start from 480 x 600
3 DG labels available on ACM | SA

MIXED STORAGE HAZCHEM SIGNS

For storage areas that have more than one hazardous substance stored. A Mixed Storage Hazchem sign will include the following information:

- All Dangerous goods diamonds 100 x 100mm related to product stored on site
- Precautionary information (i.e No Smoking, No Naked Flames)
- Emergency contact information

Safety Data Sheet Document Holder SDS-DH

- Safety Data Sheet holder – holds A4 sheets.
- Constructed from high quality polyethylene – resistant to corrosion, no risk of rust, and also weatherproof.
- Approx. measurements (mm) 308 x 230 x 45 (H x W x D)
- Attach this to your Dangerous Goods Cabinet or to the outside of your building so all your Hazardous Substance Data Sheets are readily available.

PADLOCKS

Portable Padlock
Lockout Station (12 holes)
PPLS – 12

- Made from engineering plastic this sturdy unit can carry up to 12 padlocks

Safety Padlock
38mm Hasp
SKU: SPL 38

- A 38mm high, 6mm wide steel hasp (shackle)
- PA body
- Features a 6 pin lock cylinder, key retention, and 2 keys per lock
- This padlock will tolerate temperatures from -57° to +177°

Safety Padlock 38mm Dielectric Hasp
SKU: SPLD 38

- A 38mm high, 6mm wide nylon hasp (shackle)
- PA body
- Features a 6 pin lock cylinder, key retention, and 2 keys per lock
- This padlock will tolerate temperatures from -57° to +177°

Safety Padlock 38mm
Thin Shackle
SKU: SPLT 38

- A 38mm high, 4mm wide steel THIN hasp (shackle)
- PA body
- Features a 6 pin lock cylinder, key retention, and 2 keys per lock
- This padlock will tolerate temperatures from -57° to +177°

Safety Padlock Dust Proof
SKU: SPLDP 38

- A 38mm high, 6mm wide steel hasp (shackle)
- PA body
- Features a 6 pin lock cylinder, key retention, and 2 keys per lock.
- This padlock will tolerate temperatures from -57° to +177°
- Plus dust proof rubber sleeves at the bottom of the hasp and a dust proof cover over the key hole

Safety Padlock 76mm Long Shackle
SKU: SPL 76

- A 76mm high, 4mm wide steel LONG hasp (shackle)
- PA body
- Features a 6 pin lock cylinder, key retention, and 2 keys per lock.
- This padlock will tolerate temperatures from -57° to +177°

CODE = SKU + COLOUR + either KD (Keyed Differently) OR KA (Keyed Alike) e.g. CODE = SPL 38 YELLOW KD

HASPS

Lockout Hasp 25mm
LOH25

- Galvanised Steel Hasp with Nylon PA coated handle
- The Hasp's internal diameter is 25mm, and its 6 lockout holes are 10mm in diameter

Lockout Hasp 38mm
LOH38

- Galvanised Steel Hasp with Nylon PA coated handle
- The Hasp's internal diameter is 38mm, and its 6 lockout holes are 10mm in diameter

Lockout Hasp Long 43 x 173
LOHL – K42

- Push design Nylon lockout hasp with 9mm diameter holes for padlocks

Snap On Lockout Hasp Red
SOLH – RED

- Aluminium snap on lockout, for up to 5 padlocks
- Lightweight but sturdy
- Internal height of the Hasp's main loop is 55mm

Lockout Hasp 25mm
LOH6Y – K51

- Aluminium lockout hasp, for up to 6 padlocks
- Lightweight but sturdy
- Internal height of the Hasp's main loop is 33mm

ELECTRICAL LOCKOUT

Miniature Circuit Breaker Yellow
10mm wide
MCB – Y 45X25

- Reinforced Nylon PA
- Easy to lock with a screwdriver
- Accommodates one safety padlock

Miniature Circuit Breaker Blue
23mm wide
MCB – Y 51X25

- Reinforced Nylon PA
- Easy to lock with a screwdriver
- Accommodates one safety padlock

Medium Circuit Breaker Yellow
MCB – Y 125X63

- Reinforced Nylon PA
- Easy to lock with a screwdriver
- Accommodates one safety padlock

Miniature Circuit Breaker Pin Out
MCBPO – D01

- Made from Nylon PA
- Pin OUT for hole spacing up to 12mm

Miniature Circuit Breaker Pin In
MCBPI – D02

- Made from Nylon PA
- Pin IN for hole spacing up to 12mm

Switch Lockout
Case 50 x 47
SWLOC

- High strength transparent resin case, to prevent access to buttons
- Inner diameter of hole in red base is 22mm

Electrical Plug Lockout
EPL

- Made from PP Engineering Plastic
- Will accommodate 2 padlocks for safe lockout
- Available in 3 sizes to suit:
13mm cable | EPL – 13
20mm cable | EPL – 20
25mm cable | EPL – 25

Circuit Breaker for up to 12mm switch
CB – D17

- Die-cast aluminium with plastic coating
- Accommodates a 12mm thick switch, and 1 padlock for safe lockout

Basic Lockout Kit
BLK

- Handy carry pouch
- 5 hardwearing lockout tags
- 2 x yellow MCB 10mm wide
- 1 x blue MCB 23mm wide
- 1 x 38mm Safety Padlock - steel hasp
- 1 x 38mm Safety Padlock – dielectric hasp
- 1 x Plastic Lockout Hasp Long

SERVICING YOUR SAFETY NEEDS

At Safety Genius, we provide health and safety signage and solutions to support a range of industries:

Electrical

We provide for all electrical signage and solutions to ensure maintenance and repair can be undertaken safely.

Manufacturing

Our range of signage helps to ensure workplace health and safety standards are met and staff can work in a safe environment.

Roading

Visibility is essential in the roading industry, for staff and vehicles. Our range of signage ensures your brand won't be missed.

Construction

Keeping construction sites safe and secure requires a range of effective signage solutions. At Safety Genius we have them all.

Check out our full range online [safetygenius.co.nz](https://www.safetygenius.co.nz)

TRANSPORT SIGNS

An over dimension vehicle over 3.1 metres wide and escorted by a pilot vehicle must display an OVERSIZE sign.

OVERSIZE SIGNS MUST:

- Comply with the illustrated dimensions
- Be mounted at the front and rear of the over dimension vehicle, so that the sign can be seen clearly by approaching drivers.

THE SIGN MAY BE SPLIT INTO TWO PARTS, AS LONG AS:

- The word OVER and the word SIZE are on separate parts
- Both parts of the sign are mounted at the same height
- The combined length of the parts is at least 1100mm.

REFLECTIVE FLAGS

We make these to order. Almost any size and/or text is possible. Get in touch to discuss.

DURING DAYLIGHT HOURS, THE SIGN MUST:

- Have matt black lettering on a yellow green background with a matt black border (unless the retro-reflective version below is used).

DURING NIGHTTIME HOURS, THE SIGN MUST:

- Consist of retro-reflective material with black lettering on a yellow green background
- Comply with AS/NZ 1906.1:1993 Retro-reflective materials and devices for road traffic control purposes, Part 1: Retro-reflective materials

You can't display an OVERSIZE sign on a vehicle unless you're required to by the Vehicle Dimensions and Mass Rule.

TRANSPORT SAFETY SIGNS

1100 x 520 | AL
Single/Double sided

TS105 can be put on reverse of TS101, TS102, TS103 and TS104

Transport safety signs can be available in reflective material for day/night use. The signs can also be available for day use only.

Night/Day
– diamond grade reflective
Day
– yellow fluro

ORDER OF DISPLAY OF PILOT SIGNS FOR VARIOUS SIZE LOADS

	WIDTH LESS THAN 3.1M	WIDTH GREATER THAN 3.1M AND UP TO INCLUDING 5M
First Pilot	Long Load Follows	Wide Load Follows
Second Pilot (if required)	Long Load Follows	Wide Load Follows
Over dimension load		
Rear Pilot	Long Load Ahead	Wide Load Ahead

HAZARD WARNING MARKINGS AND SIGNS

Fluorescent yellow flags (at least 400mm long and 300mm wide) must be attached to indicate the:

- Excess width of a vehicle or load at its front and rear
- The front of the load (if it has excess front overhang)
- The rear of the load (if it has excess rear overhang)
- The rear of the load (if it has excess length).

You may use retro-reflective hazard panels coloured yellow-green with an orange diagonal stripe instead of flags.

HAZARD WARNING PANELS MUST BE ATTACHED TO INDICATE THE:

Fluorescent yellow flags (at least 400mm long and 300mm wide) must be attached to indicate the:

- Excess width on each side of an over width load or vehicle at its front and rear
- Front of a load with excess front overhang
- Rear of a load with excess rear overhang
- Rear of a load for excess length.

THE PANELS MUST:

- Comply with AS/NZ 1906.1:1993 Retro-reflective materials and devices for road traffic control purposes, Part 1: Retro-reflective materials
- Consist of retro-reflective material with a 200mm wide chevron pattern with alternate yellow-green and orange retro-reflective sheeting
- Have the illustrated dimensions and orientation
- Be frangible.

You can't display a hazard warning panel on a vehicle unless you're required to by the Vehicle Dimensions and Mass Rule.

While operating under the terms of a HPMV permit, the vehicle must display a retro-reflective 'H' sign to the front and rear that complies with AS/NZS 1906.1:2007 – Retro-reflective materials and devices for road traffic control purposes, Part 1: Retro-reflective materials.

On a standard motor vehicle, if the vehicle load is reduced below 44,000kg then the sign does not need to be removed, but may be. On an over-length vehicle the sign must remain in place at all times. A vehicle that does not have an HPMV permit is not allowed to display this sign.

TRANSPORT SIGNS

MULTI-HAZCHEM FLIP SIGNS DG FLIP

- Size: Backing Plate size 350 x 350
- Our multi-HAZCHEM flip signs hold a comprehensive range of dangerous goods placards for ease of use.

We can custom print the centre page with your own company logo – please get in touch to discuss.

FREESTANDING SIGNS

THE BRANDMASTER ALL TERRAIN DISPLAYS

Flexible: For quick message exchange simply slide the old sign out and the new one in.

Robust: Constructed from ultra strong UV stabilised HIPS. Designer frames eliminate sign droop and distortion.

Stable: With water fillable bases holding 11kgs or 200mm spikes, these displays aren't going anywhere! Safer for high traffic areas with lightweight construction, compact profiles and minimal floor space footprint.

Product Specifications:

Freestanding water fillable base up to 11.5kg.

Principal product materials UV stabilised, high impact HIPS.

SIDEWALK | FOOTPATH SIGNS

Does not distort or breakdown. Colour stable even in high UV areas.

Standard panel size of 800 x 600mm (larger base can be partially filled with water or sand for additional stability) and can be supplied with wheels so they can be easily moved. Panels can be customised in profile cut designs and shapes and corporate logos can be moulded into the base.

Meets NZ local authority requirements and council by-laws.

12-month guarantee.

Base Colours

GROUND SPIKE SIGNS

FM299

Does not distort or breakdown. Colour stable even in high UV areas. Sign and stand overall height 600mm.

Corflute sign to fit into stand is 450 x 300mm. Single or double sided.

Sign can be made to suit your specific requirements.

CLASSIC A FRAME STANDS

Lightweight robust plastic for long life and great stability. Hinge limiter ensures legs open to correct position. Can be customised to your specific needs.

Printed both sides. Approx 600mm high.

SAFETY FLOOR GRAPHICS

Ideal to increase awareness of hazards where wall mounting is not always practical.

The floor graphics are manufactured with a hard wearing clear over-laminate film with a textured anti-slip surface and should only be applied to clean, dry, smooth surfaces.

400 x 400 | SA

CLASSIC A FRAME STANDS

Heavyweight ACM panel with hinge. Can be single or double sided 600 x 800mm or made to your size and requirements.

PIPEMARKER SIGNS

Pipe markers aid in the quick identification of a pipe's contents – especially in an emergency situation. A successful pipe identification program helps employees, contractors and emergency responders to distinguish between pipes where there are several side by side. Pipe markers also save valuable time when tracing lines is necessary during maintenance.

Where Should Pipe Markers be Located?

Pipe markers are to be placed adjacent to all junctions, valves, service appliances, bulkhead and wall penetrations. Markers shall be spaced no more than 5m apart except for long, uninterrupted straight runs of external services where spacing shall not exceed 50m.

Pipe Marker Design/Layout Requirements

A marker is comprised of a printed word or words on a coloured background with a contrasting border and arrow to show direction of flow.

Marker Colours

The legend and background colours of a pipe marker are determined by the pipe's contents.

PIPE400

450 x 60 | SA

Manufactured to NZS 5807:1980
and AS1345:1995

PIPE300
