TRANSPORT SIGNAGE SOLUTIONS

Out on the road? Your vehicle needs to convey safety information clearly and accurately. Here at Safety Genius, we have the solutions.

Wide load, heavy load, long load, dangerous load – whatever load your vehicle is carrying, it needs to be safe. That includes applying the right safety signage so road users can quickly and clearly see any potential hazards.

But transport signage is complex. Different sizes, images and materials need to be used depending on the situation. Driving at night? You'll need retro-reflective signage. Carrying a wide load? Your pilot vehicle needs to be visible.

Fortunately, the team at Safety Genius know what transport signage you need for every occasion. Whether it's placards required for carrying Dangerous Goods across the Cook Strait or indicating your vehicle is permitted to carry heavy loads, our team can design, manufacture and advise on the safety signage solution that meets your transport needs.

We can also make your signs to order and add branding to your vehicles. Whatever your transport safety and signage requirements, just ask the Safety Genius team.

“ Safety Genius goes the extra mile with product quality and a will to fulfil your orders at any cost, all done with great pleasure. ”

HAZARD WARNING MARKINGS AND SIGNS

Hazard warning markings and signs must be used to indicate excess width and load of a vehicle.

Hazard warning panels must be attached to indicate the:

- excess width on each side of an over-width load or vehicle at its front and rear
- front of a load with excess front overhang
- rear of a load with excess rear overhang or excess length

Hazard panels must comply with AS/NZ 1906.1:1993 retro-reflective materials and devices for road traffic control purposes.

KEY

SA = Self-adhesive

CF = Corflute

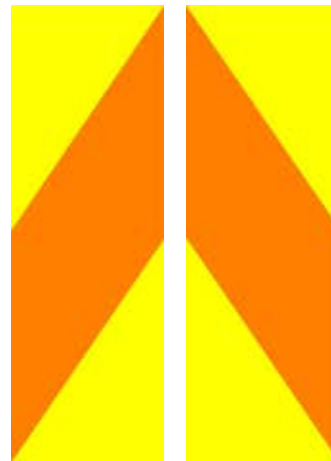

PVC = Rigid Plastic

ALI = Aluminium

ACM = Aluminium over PVC core

“ Darwin and his team are our preferred supplier for signage and associated products they supply. We have always had great service and competitive pricing but more importantly we have developed a long term relationship that is based on **Safety Genius** going the extra mile. ”

Ross McGlone | WORKWEAR & SAFETY 2000 LTD

OVERSIZE SIGNS

A vehicle over 3.1 metres wide and escorted by a pilot vehicle, must display an OVERSIZE sign. This must be mounted at the front and rear of the over-dimension vehicle, so the sign can be seen clearly by approaching drivers.

During daylight hours, the sign must have matt black lettering on a yellow/green background with a matt black border (unless the retro-reflective version is used).

During the hours of darkness, the sign must consist of a retro-reflective material with black lettering on a yellow/green background and comply with AS/NZ 1906.1:1993 retro-reflective materials and devices for road traffic control purposes, Partem 1: retro-reflective materials.

ORDER OF DISPLAY OF PILOT SIGNS FOR VARIOUS SIZE LOADS

	WIDTH LESS THAN 3.1M	WIDTH GREATER THAN 3.1M AND UP TO INCLUDING 5M
